This map has been prepared for the purpose of meeting the provincial requirements under the Clean Water Act, 2006. If it is proposed to use it for another purpose, it would be advisable to first consult with the responsible conservation authority.

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Committee, April 2010 (Updated July 2016), with data supplied under licence by members of the Ontario Geospatial Data Exchange.

Waterbodies and watercourses located within the extent of an intake protection zone are included in that zone.

Trent Assessment Report Map 4-15c

Areas for Significant, Moderate, & Low Drinking Water Threats (Chemical & Pathogen Threats)

These tables indicate where chemical and pathogen threats are (or would be for future activities) significant, moderate, or low in the Intake Protection Zone. The table numbers and codes refer to the Provincial Table of Circumstances that list the circumstances under which these threats can be significant, moderate, or low. The Provincial Tables of Circumstances can be accessed from: the source protection homepage of ontario.ca or the reports and legislation page of http://trentsourceprotection.on.ca.

Trent Assessment Report Map 4-15g
This map has been prepared for the purpose of meeting the provincial requirements under the Clean Water Act, 2006. It is provided solely for information and is not intended to be used for another purpose. It would be advisable to first consult with the responsible conservation authority.

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Region, March 2011 (updated July 2016), with data supplied under licence by members of the Ontario Geospatial Data Exchange.

The map was prepared to show the areas designated as Intake Protection Zones (IPZs) in the Lower Trent Source Protection Area. These IPZs are areas designated to protect the surface water intakes associated with the Bayside Municipal Surface Water System. The map shows the boundaries of the IPZs and indicates the level of protection required for different activities within those areas.
