

The *Clean Water Act* was developed to protect municipal, residential drinking water sources across the province from contamination and/or overuse by ensuring policies are in place to manage activities that may pose a drinking water threat. Locally, these policies are included in the Trent Source Protection Plan they apply within the Pinewood Wellhead Protection Area, shaded red and yellow on the map below. Contaminants may reach the municipal wellhead in 2 years or less if spilled in the yellow area.

The **Pinewood Municipal Well System** is one of 53 municipal, residential drinking water systems in the Trent Conservation Coalition Source Protection Region that is protected under the *Clean Water Act* and is one of 12 such systems in the Lower Trent Source Protection Area.

Water Source	Groundwater
Owned & Operated By	City of Kawartha Lakes
Serviced Population	447 (approximately)
Annual Pump Rate	155 m ³ /day (average)
Well Depths	Well 1: 107 m (backup) Well 2: 118 m (production)
Aquifer Type	Confined overburden, non-GUDI
Treatment System	Disinfection with sodium hypochlorite

Data source: Trent Assessment Report

Activities that can pose a Threat to the municipal drinking water source

- ✓ Waste disposal and sewage systems
- ✓ Livestock grazing, pasturing, confinement
- ✓ Road salt use and snow storage
- ✓ Spreading or storing of agricultural materials (i.e. manure)
- ✓ Pesticide and fertilizer storage and use
- ✓ Liquid fuel storage (ie home heating oil)
- ✓ Chemicals handling and storage
