This table indicates which activities are subject to source protection policies in the corresponding coloured areas on the map. Policies apply only if the activity is carried out under circumstances that make it a significant drinking water threat. These circumstances are detailed in the Provincial Tables of Circumstances.

Activity		Areas Where Policies Apply	
Sewage Systems	Septic System		
	Other Sewage Systems		
Agricultural Source Material	Application		
	Storage		
Non-Agricultural Source Material	Application (meat plant or sewage material)		
	Handling & Storage (meat plant material)		
Commercial Fertilizer	Application*		
	Handling & Storage		
Pesticide	Application		
	Handling & Storage		
Road Salt	Application*		
	Handling & Storage		
Fuel	Handling & Storage		
DNAPL	Handling & Storage		
Organic Solvents	Handling & Storage		
Aircraft De-Icing	Management of Runoff		
Livestock Grazing or Pasturing, Outdoor Confinement, or Farm Animal Yard			
Waste Disposal Sites (within the meaning of Part V of the EPA)			
Snow Storage			

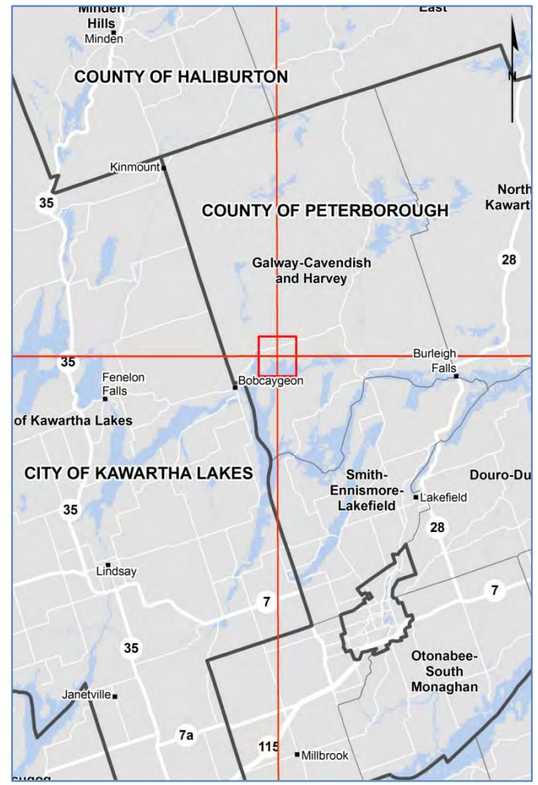

*These activities can be significant drinking water threats only if carried out in a vulnerable area that exceeds threshold values of the following parameters: percent managed land and livestock density for Commercial Fertilizer Application; and total impervious surface area for Road Salt Application (refer to Assessment Report maps).

DRINKING WATER SOURCE PROTECTION
ACT FOR CLEAN WATER

Alpine Village Municipal Well System

Otonabee-Peterborough Source Protection Area

Policy Applicability Map

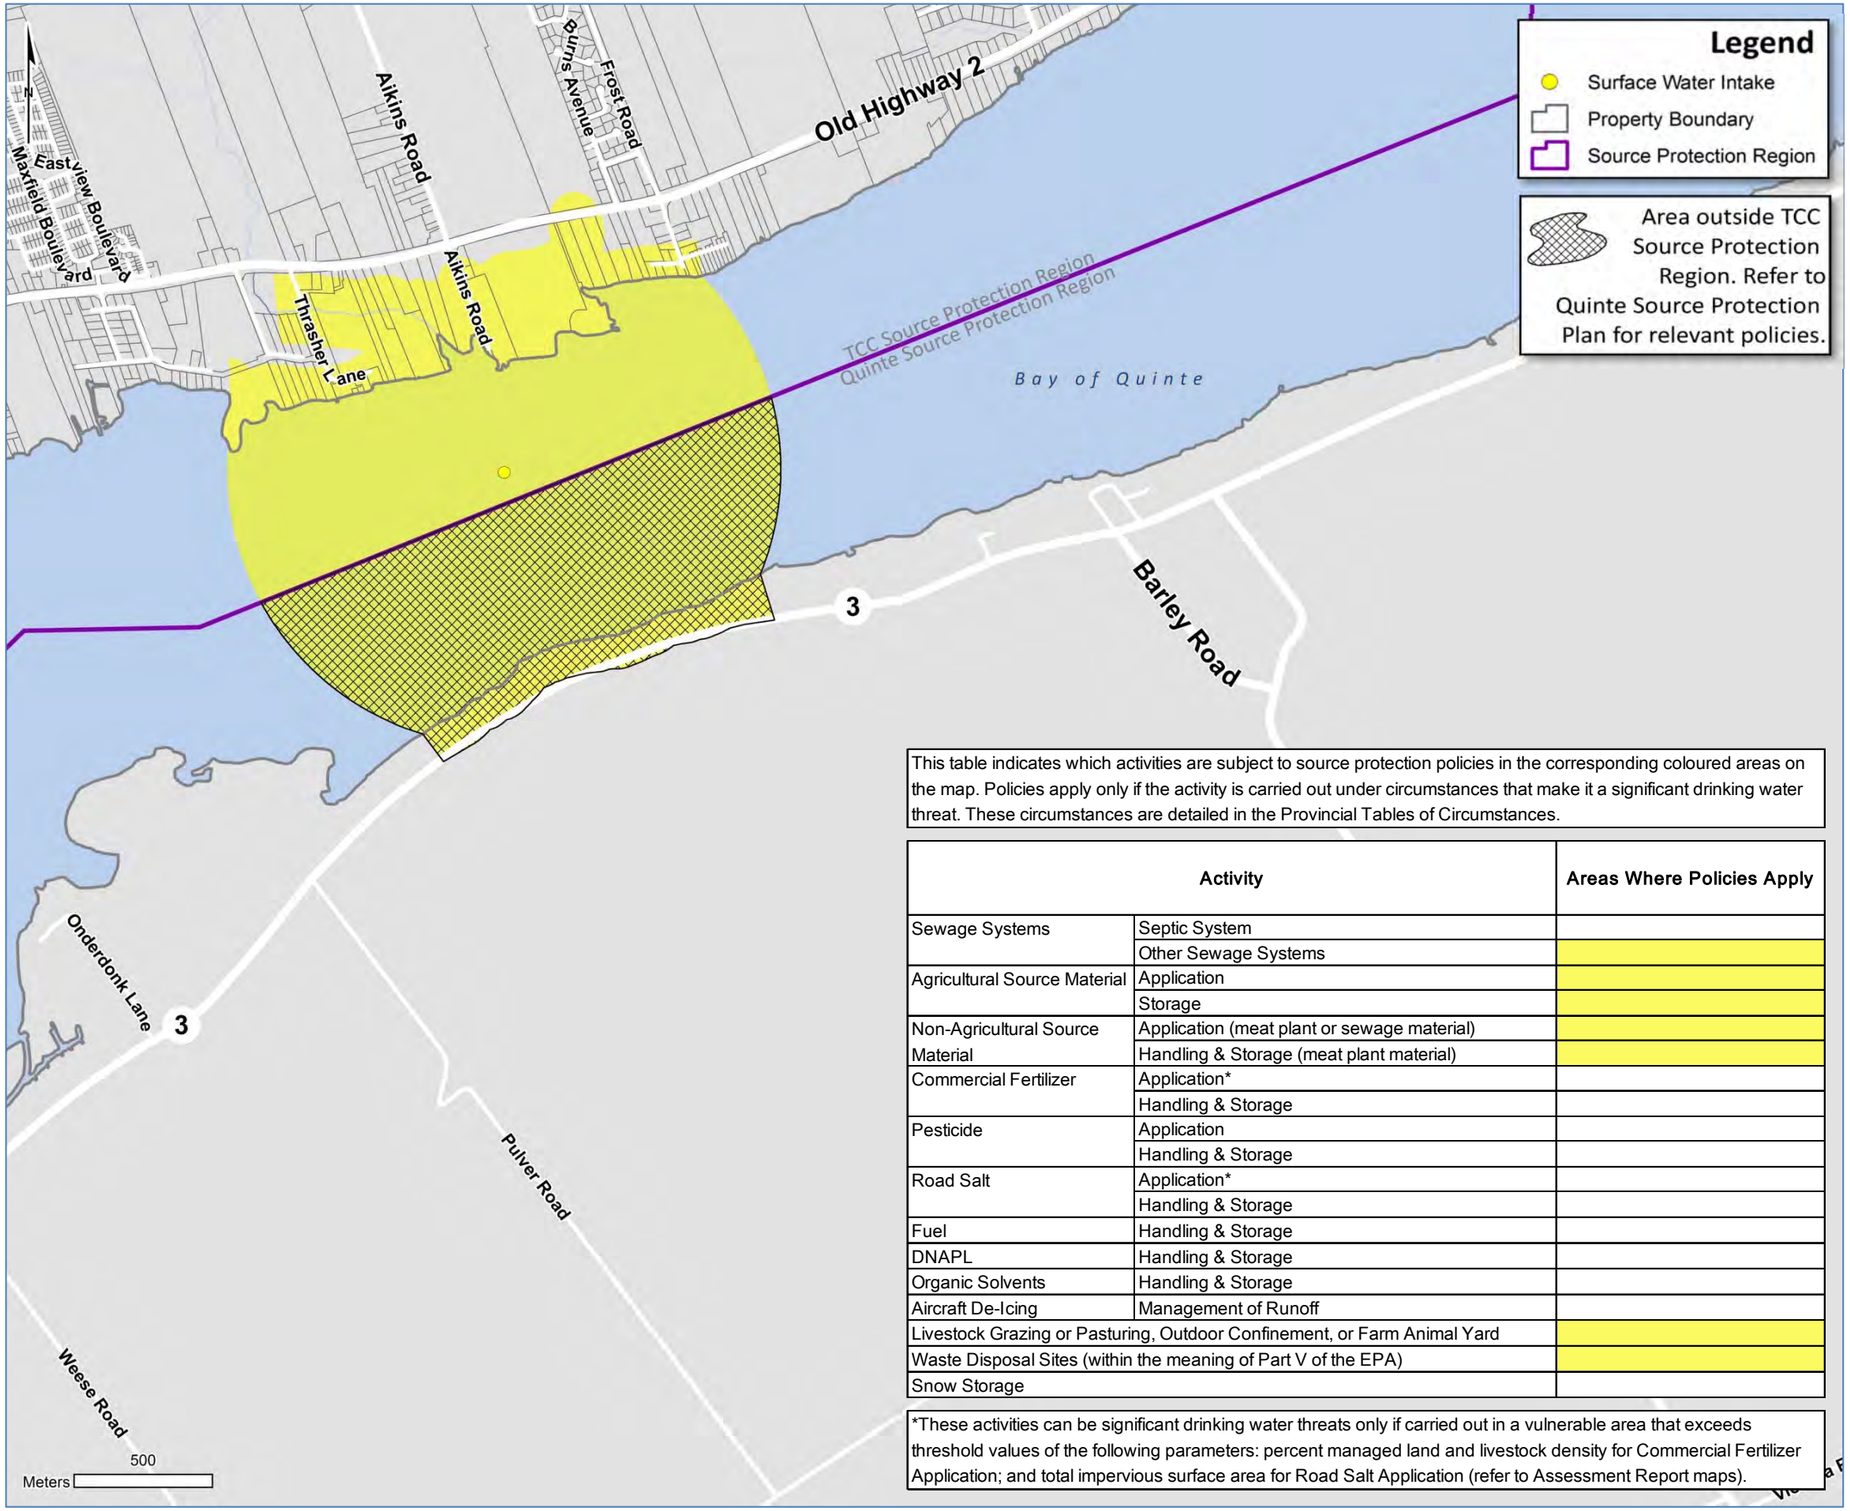

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Committee, 2014.

Waterbodies and watercourses located within the extent of an intake protection zone or wellhead protection area are included in that zone.

Ontario
Made possible through the support of the Government of Ontario

Trent Conservation Coalition Source Protection Region

Policy Applicability Map

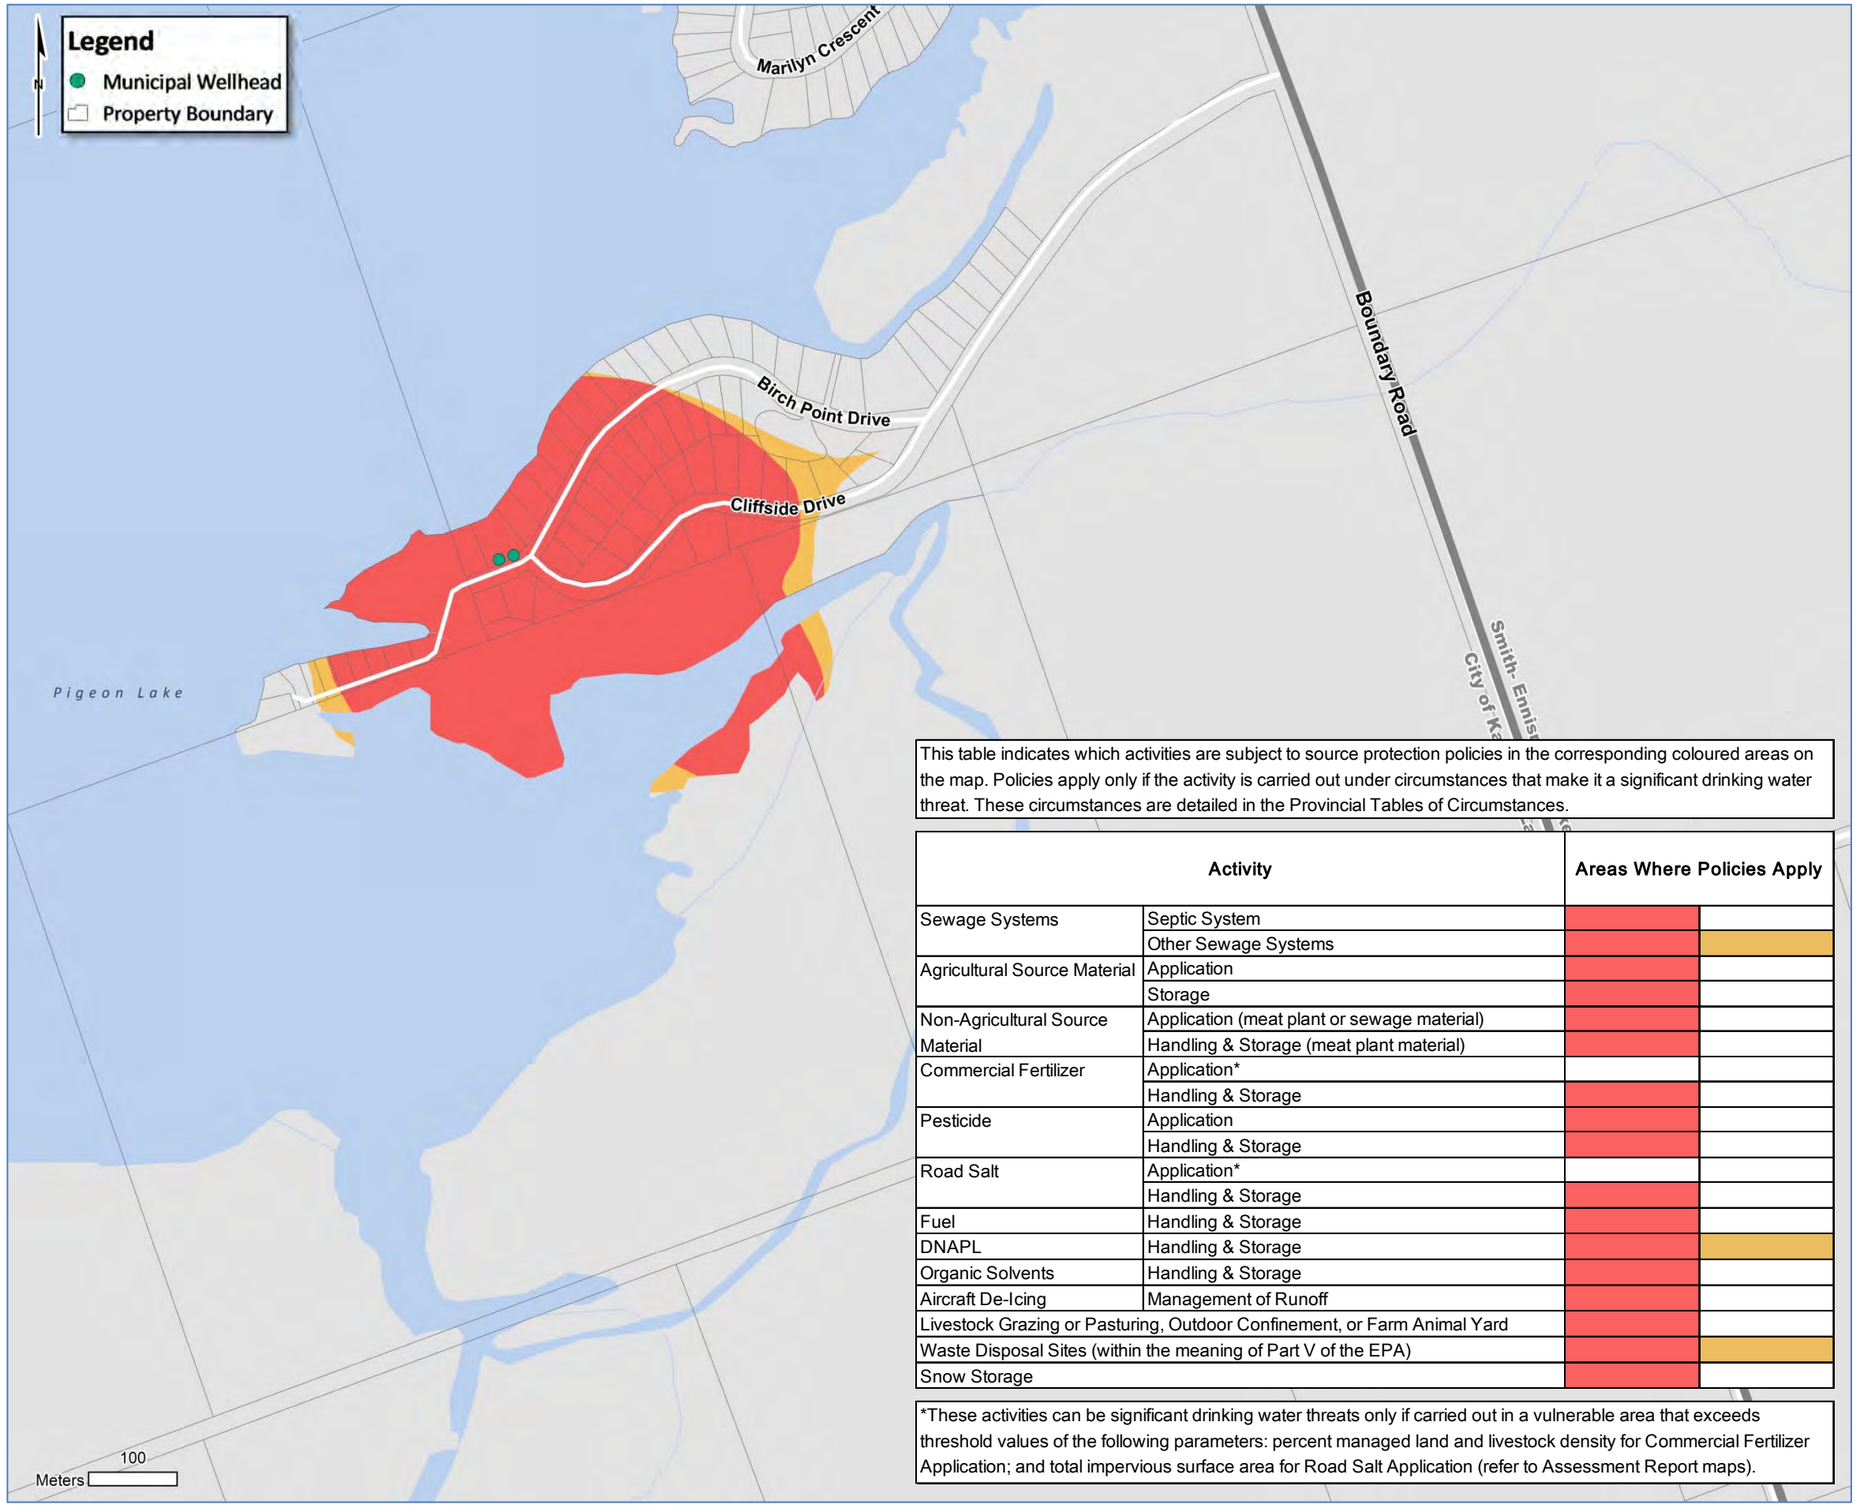

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Committee, 2014.

Waterbodies and watercourses located within the extent of an intake protection zone or wellhead protection area are included in that zone.

Ontario
Made possible through the support of the Government of Ontario

Trent Conservation Coalition Source Protection Region

www.trentsourceprotection.on.ca

This table indicates which activities are subject to source protection policies in the corresponding coloured areas on the map. Policies apply only if the activity is carried out under circumstances that make it a significant drinking water threat. These circumstances are detailed in the Provincial Tables of Circumstances.

Activity		Areas Where Policies Apply	
Sewage Systems	Septic System		
	Other Sewage Systems		
Agricultural Source Material	Application		
	Storage		
Non-Agricultural Source Material	Application (meat plant or sewage material)		
	Handling & Storage (meat plant material)		
Commercial Fertilizer	Application*		
	Handling & Storage		
Pesticide	Application		
	Handling & Storage		
Road Salt	Application*		
	Handling & Storage		
Fuel	Handling & Storage		
DNAPL	Handling & Storage		
Organic Solvents	Handling & Storage		
Aircraft De-Icing	Management of Runoff		
Livestock Grazing or Pasturing, Outdoor Confinement, or Farm Animal Yard			
Waste Disposal Sites (within the meaning of Part V of the EPA)			
Snow Storage			

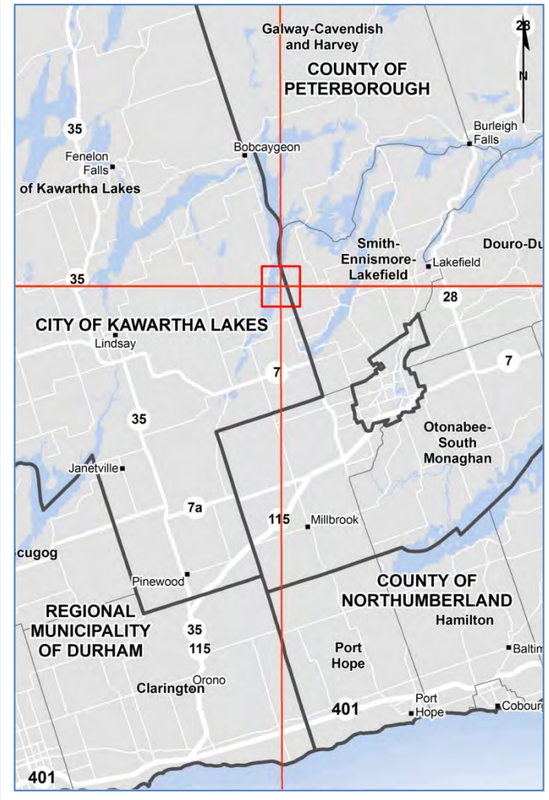

*These activities can be significant drinking water threats only if carried out in a vulnerable area that exceeds threshold values of the following parameters: percent managed land and livestock density for Commercial Fertilizer Application; and total impervious surface area for Road Salt Application (refer to Assessment Report maps).

DRINKING WATER SOURCE PROTECTION
ACT FOR CLEAN WATER

Grafton Municipal Well System

Lower Trent Source Protection Area

Policy Applicability Map

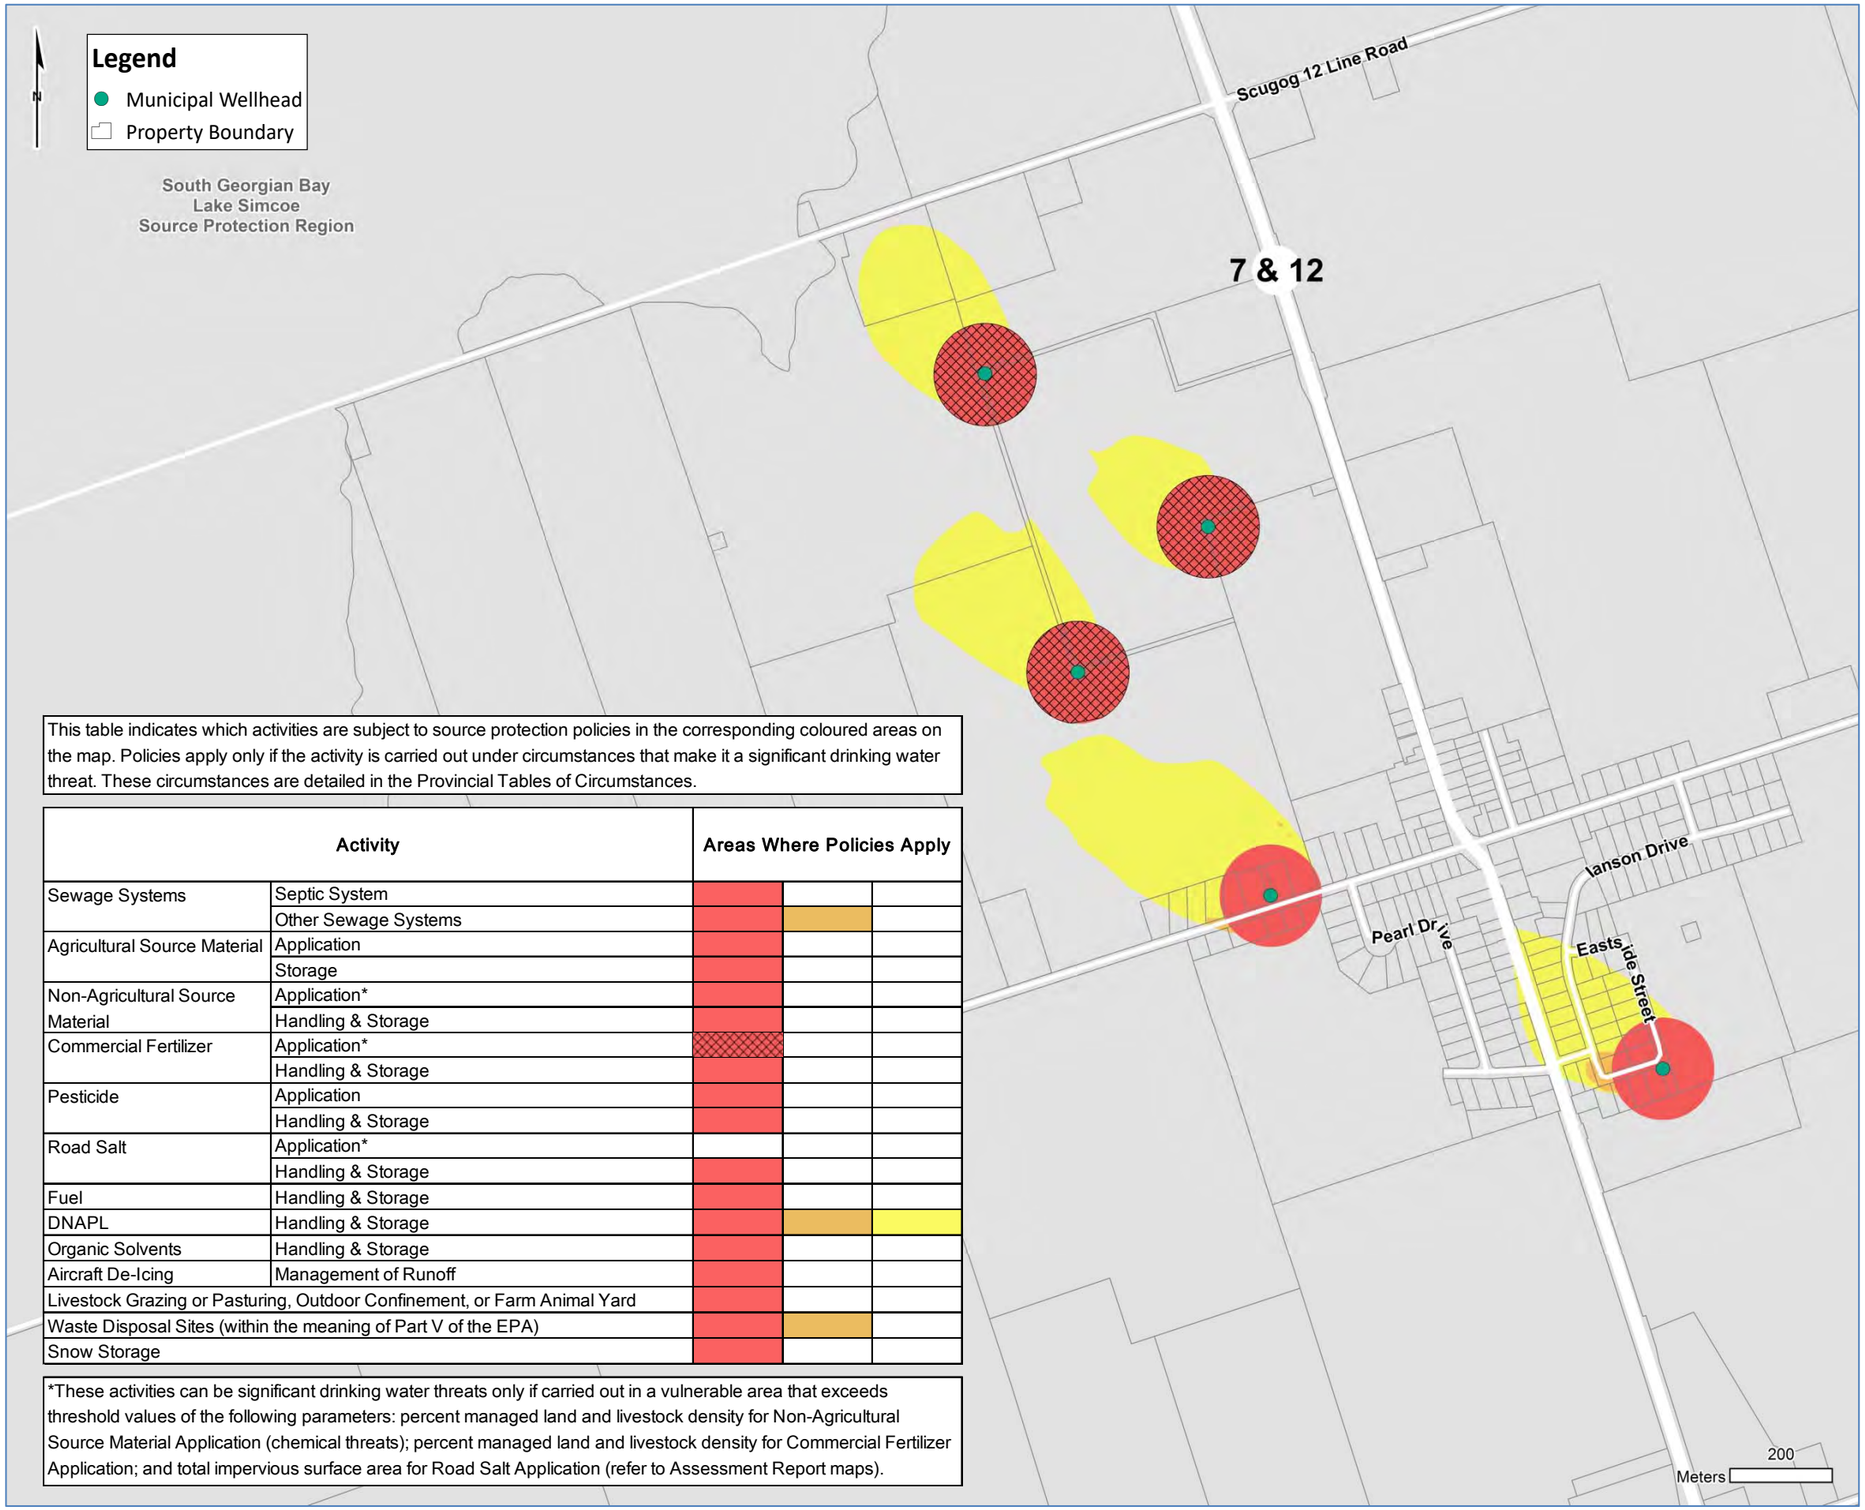

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Committee, 2014.

Otonabee-Peterborough Source Protection Area

Policy Applicability Map

PRODUCED BY Lower Trent Conservation on behalf of the Trent Conservation Coalition Source Protection Committee, 2014.

Waterbodies and watercourses located within the extent of an intake protection zone or wellhead protection area are included in that zone.

Ontario
Made possible through the support of the Government of Ontario

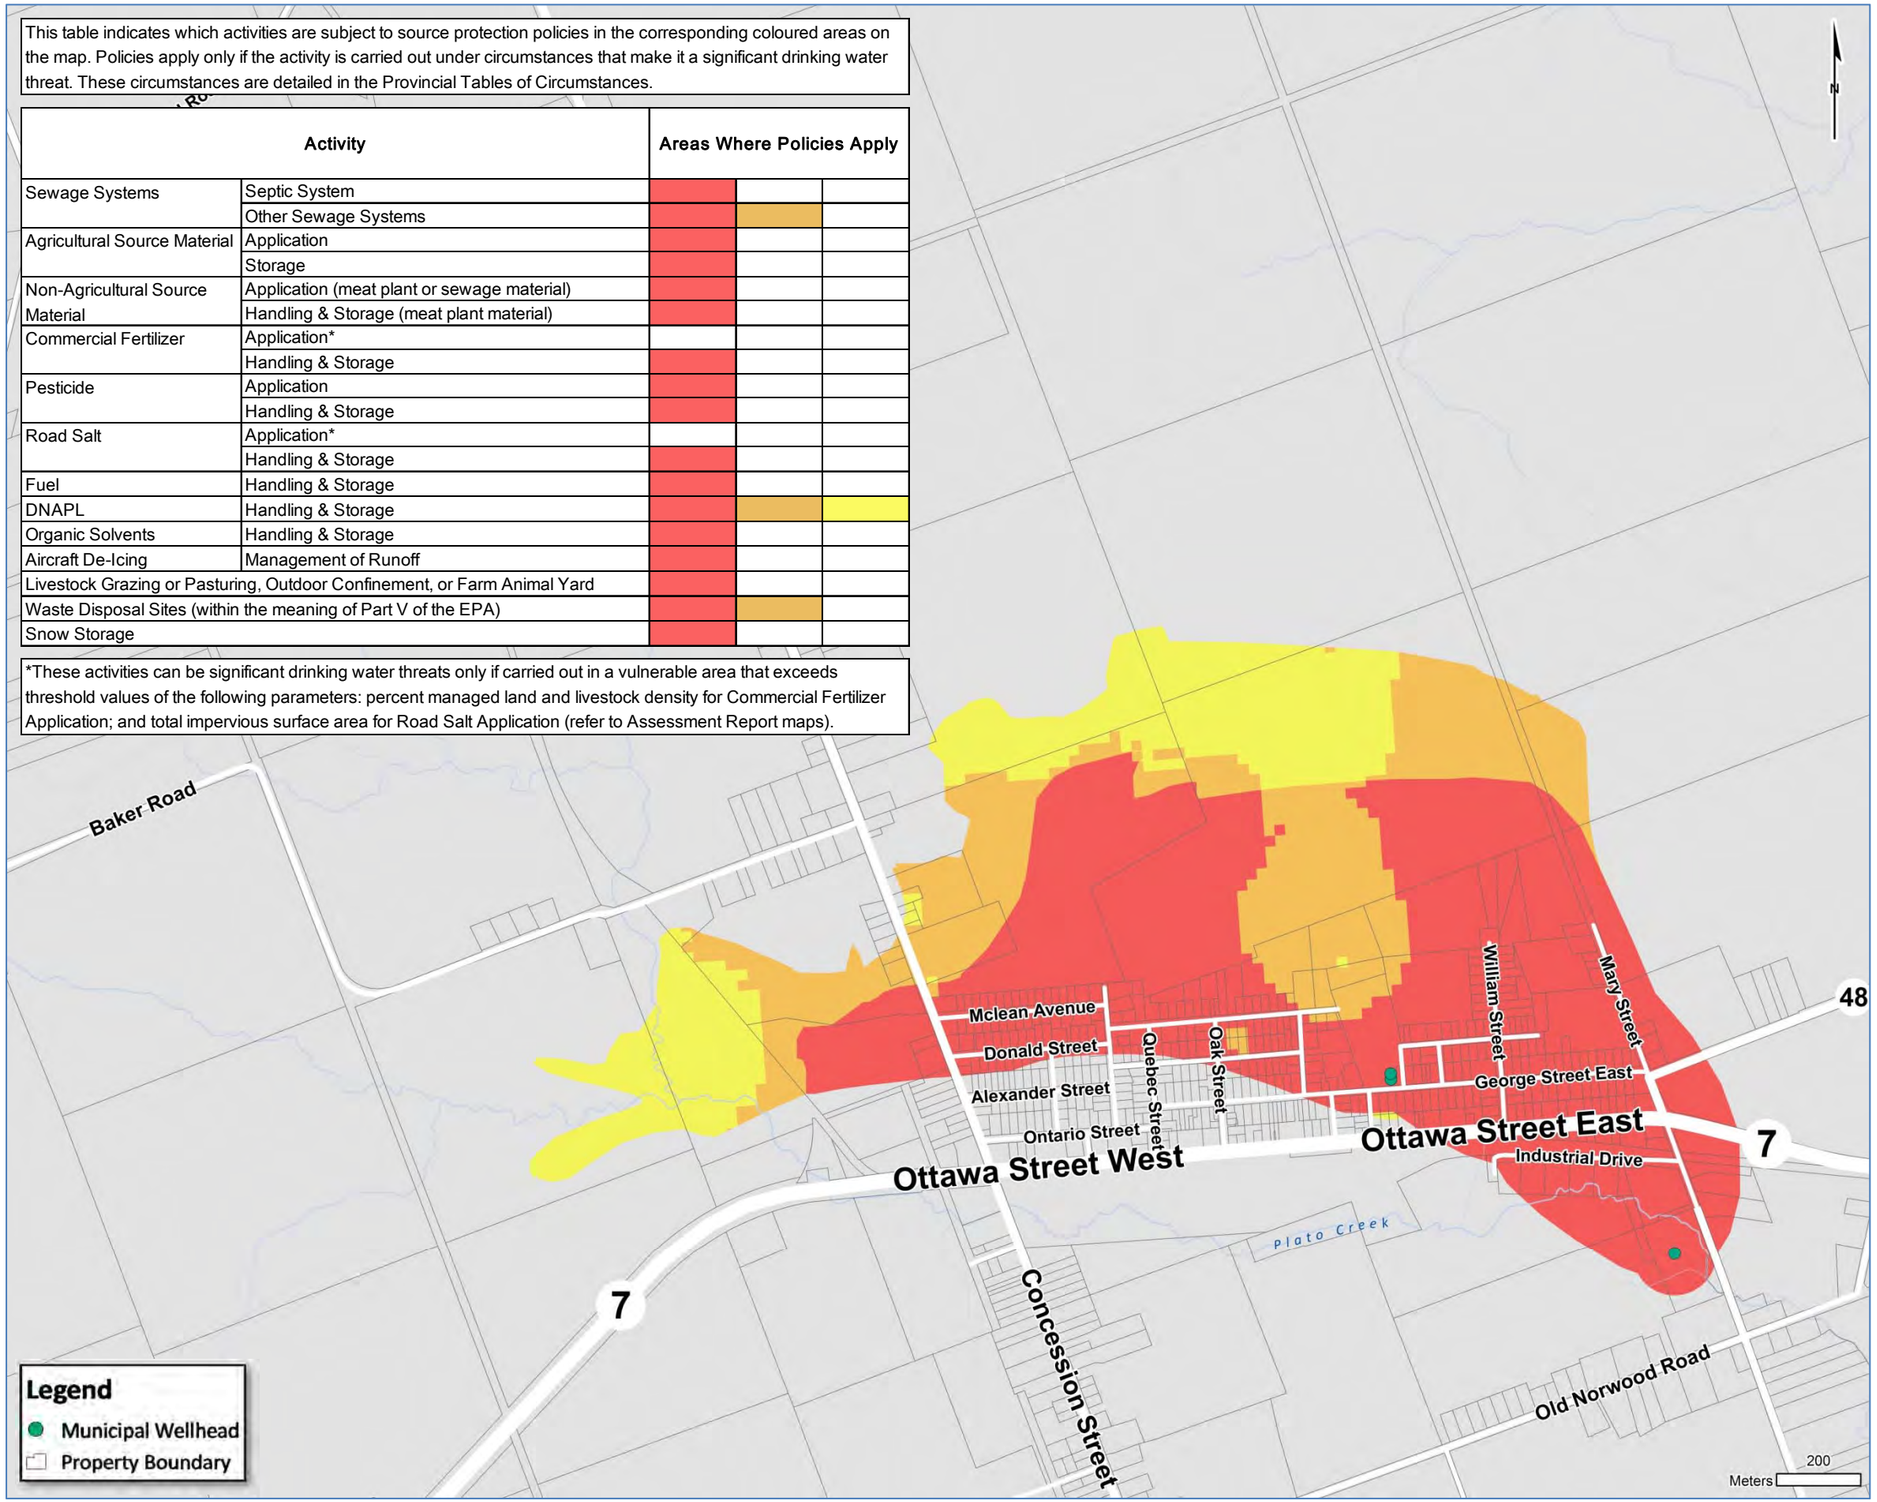

Trent Conservation Coalition Source Protection Region

www.trentsourceprotection.on.ca

This table indicates which activities are subject to source protection policies in the corresponding coloured areas on the map. Policies apply only if the activity is carried out under circumstances that make it a significant drinking water threat. These circumstances are detailed in the Provincial Tables of Circumstances.

Activity		Areas Where Policies Apply	
Sewage Systems	Septic System		
	Other Sewage Systems		
Agricultural Source Material	Application		
	Storage		
Non-Agricultural Source Material	Application (meat plant or sewage material)		
	Handling & Storage (meat plant material)		
Commercial Fertilizer	Application*		
	Handling & Storage		
Pesticide	Application		
	Handling & Storage		
Road Salt	Application*		
	Handling & Storage		
Fuel	Handling & Storage		
DNAPL	Handling & Storage		
Organic Solvents	Handling & Storage		
Aircraft De-Icing	Management of Runoff		
Livestock Grazing or Pasturing, Outdoor Confinement, or Farm Animal Yard			
Waste Disposal Sites (within the meaning of Part V of the EPA)			
Snow Storage			

*These activities can be significant drinking water threats only if carried out in a vulnerable area that exceeds threshold values of the following parameters: percent managed land and livestock density for Commercial Fertilizer Application; and total impervious surface area for Road Salt Application (refer to Assessment Report maps).

Activity (Drinking Water Threat)	Circumstances	Area where Activity is a Significant Drinking Water	Areas Where Policies Apply
An activity that takes water from an aquifer or a surface water body without returning the water taken to the same aquifer or surface water body.	1. An increase to an existing taking or a new taking. 2. The water is or would be taken from within a WHPA-Q1. 3. Section 34 of the *Ontario Water Resources Act* requires a permit to take water in respect of the increase or new taking. 4. Despite the local area from which the water is or would be taken having been assessed for the purposes of the latest assessment report to have a risk level of moderate in accordance with Part IX, the local area would be assessed to have a risk level of significant if the increase to the existing taking or the new taking were factored into the risk level assessment.	The local area from which the water is or would be taken if the area relates to one or more wells and it was assessed to have a risk level of moderate in accordance with Part IX of Technical Rules (2009).	
An activity that reduces recharge to an aquifer.	1. A modified activity or a new activity. 2. The activity is or would be wholly or partly located within a WHPA-Q2. 3. Despite the local area from which the water is or would be taken having been assessed for the purposes of the latest assessment report to have a risk level of moderate in accordance with Part IX, the local area would be assessed to have a risk level of significant if the modified activity were factored into the risk level assessment.	The local area from which the water is or would be taken if the area relates to one or more wells and it was assessed to have a risk level of moderate in accordance with Part IX of Technical Rules (2009).
